CIS 130 Website Plan

1. Planned Pages
 - a. Index.html (Title: My Journey through CIS 130)
 - b. Html.html (Title: Semantic HTML elements)
 - c. Layout.html (Title: Grid vs Flexbox)
 - d. Responsive.html (Title: Dynamic webpages)
 - e. Access.html (Title: Ease of use)
 - f. Valid.html (Title: Validation)
2. Content details:
 - a. Index: Homepage for my website. Will contain my name, avatar, and why I chose this course. Will include a navbar to my other pages
 - b. Html: I will include some examples of various semantic html elements by using them in the actual webpage. For example, I can put 1 of the sources I used to help me with the semantic elements in a section element
 - c. Layout: I will put examples of the 2 main css layouts, grid and flexbox.
 - d. Responsive: I will put various images on this page, some which have responsive CSS and some which don't, to showcase the difference between responsive and non-responsive designs
 - e. Access: Put various images, a hrefs, and embedded videos with accessibility features
 - f. Valid: Put links to the 3 validators that we used in this course
3. Planned media:
 - a. Videos: <https://www.youtube.com/watch?v=aEj6k-gi9-s>,
 - b. Websites: https://www.w3schools.com/css/css_grid.asp,
<https://blog.hubspot.com/website/website-typography>
4. Navigation Plan

Nav bar that has links to their respective site pages

Footer has link to my github
5. Accessibility:
 - a. Images that show an example of something that needs explaining
 - b. H1 for main headings, H2 for section headings
 - c. Working on it
6. index.html and site pages would be in the
